Introduction

The course "Ethics and Accountability in Financial Leadership" is designed to equip financial leaders with the necessary skills to uphold ethical standards and accountability in their professional lives. Over the span of five days, participants will explore essential concepts and practices that ensure integrity and responsibility in financial decision-making, fostering trust and transparency in their organizations.

Objectives

- Understand the foundational principles of ethics in financial leadership.
- Identify real-world ethical dilemmas and learn strategies for resolution.
- Explore the role of accountability in fostering ethical behavior.
- Enhance decision-making skills by integrating ethical considerations.
- Promote ethical culture within financial teams and organizations.

Course Outlines

Day 1: Foundations of Ethics in Finance

- Introduction to ethical theories and principles.
- Understanding the significance of ethics in financial decision-making.
- The relationship between ethics and financial performance.
- Case studies of ethical failures in finance.
- Establishing a personal code of ethics.

Day 2: Ethical Decision-Making Models

- Review of decision-making frameworks.
- Steps in ethical decision-making processes.
- Challenges in making ethical financial decisions.
