

London TDM

Project Management Training Courses

Course Venue: United Kingdom - London

Course Date: From 26 April 2026 To 30 April 2026

Course Place: London Paddington

Course Fees: 6,000 USD

Introduction

The "Project Lifecycle and Methodologies" course is designed to equip professionals with the knowledge and skills required to effectively manage projects from inception to completion. Understanding the project lifecycle and the various methodologies available is crucial for successful project management. This course will delve into different approaches, their advantages, and their suitable application to real-world projects.

Objectives

- Understand the stages of the project lifecycle
- Explore different project management methodologies
- Identify the advantages and limitations of each methodology
- Apply appropriate methodologies to different types of projects
- Develop practical skills in managing projects using selected methodologies

Course Outlines

Day 1: Introduction to Project Management

- Definition and importance of project management
- Key components of project management
- The role of a project manager
- Understanding stakeholders and their influence
- Overview of the Project Management Body of Knowledge (PMBOK)

Day 2: Understanding Project Lifecycles

- Phases of the project lifecycle
- Initiation and planning
- Execution and monitoring
