

London TDM

Project Management Training Courses

Course Venue: United Kingdom - London

Course Date: From 19 April 2026 To 23 April 2026

Course Place: London Paddington

Course Fees: 6,000 USD

Introduction

The "Mastering Scrum Framework" course is designed for professionals who are eager to deepen their understanding of the Scrum methodology and its practical application in various project environments. This five-day intensive course provides an immersive experience, combining theory with hands-on exercises to equip participants with the skills necessary to effectively implement Scrum practices within their organizations, boost team productivity, and achieve project success.

- Understand the foundational principles and practices of the Scrum framework.
- Identify and define roles within the Scrum team.
- Learn to create, manage, and prioritize a product backlog.
- Develop skills to facilitate Scrum events effectively.
- Enhance problem-solving skills using Scrum practices.

Course Outlines

Day 1: Introduction to Scrum

- Overview of Agile methodologies
- Understanding the principles and values of Scrum
- The Scrum framework: roles, events, and artifacts
- Benefits of using Scrum in project management
- Exercise: Comparing traditional project management and Scrum

Day 2: Scrum Roles and Responsibilities

- Detailed look at Scrum roles: Product Owner, Scrum Master, and Development Team
- Effective communication and collaboration within a Scrum team
- Responsibilities and expectations for each role
- How to build a self-organizing team
- Exercise: Role-playing scenarios

Day 3: Managing the Product Backlog

- Understanding user stories and product backlog items
- Techniques for backlog prioritization and refinement
- Writing and slicing user stories
- Maintaining a healthy product backlog
- Exercise: Crafting and refining user stories

Day 4: Scrum Events and Activities

- Deep dive into Scrum events: Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective
- Facilitating productive Scrum events
- The importance of time-boxing in Scrum
- Inspection and adaptation practices
- Exercise: Conducting mock Scrum events

Day 5: Advanced Scrum Techniques and Challenges

- Scaling Scrum for large projects and distributed teams
- Common challenges and solutions in Scrum implementations
- Continuous improvement and Scrum metrics
- Case studies and success stories
- Final exercise: Developing a Scrum implementation plan
