

London TDM

Procurement and Supply Chain Management Training Courses

Course Venue: Malaysia - Kuala Lumpur

Course Date: From 14 June 2026 To 18 June 2026

Course Place: Royale Chulan Hotel

Course Fees: 6,000 USD

Introduction

The professional course "ERP and SAP for Supply Chain Professionals" is designed to provide a comprehensive understanding of Enterprise Resource Planning (ERP) systems, with a focus on SAP and its applications in supply chain management. This course will cover the key modules of SAP that are relevant to supply chain processes, enabling professionals to optimize and enhance their organizations' supply chain operations.

Objectives

- Understand the fundamentals of ERP systems and their importance in supply chain management.
- Gain in-depth knowledge of SAP modules relevant to supply chain processes.
- Learn how to integrate SAP software to optimize supply chain management.
- Enhance problem-solving skills within the context of SAP ERP solutions.
- Build the ability to implement and manage SAP-driven supply chain projects.

Course Outlines

Day 1: Introduction to ERP and SAP

- Overview of ERP systems and their role in business
- Introduction to SAP and its significance in supply chains
- Understanding the SAP architecture and modules
- Discussion on the need for ERP systems in supply chain management
- Case study: Successful ERP implementations in supply chains
