

London TDM

Procurement and Supply Chain Management Training Courses

Course Venue: Malaysia - Kuala Lumpur

Course Date: From 31 May 2026 To 04 June 2026

Course Place: Royale Chulan Hotel

Course Fees: 6,000 USD

Introduction

In today's rapidly evolving economic landscape, the importance of sustainable practices in supply chain management cannot be overstated. This 5-day professional course, "Green Supply Chain and Circular Economy," is designed to equip participants with the knowledge and skills necessary to integrate sustainable practices into their supply chains while embracing the principles of a circular economy. Through a mix of theoretical concepts and practical applications, attendees will learn how to transform their supply chains into engines of sustainable growth.

Objectives

- Understand the principles of a green supply chain and circular economy.
- Analyze the environmental impact of traditional supply chains.
- Explore strategies for integrating sustainability into supply chain operations.
- Examine the role of technology in promoting sustainable practices.
- Develop actionable plans to transition towards a greener supply chain.

Course Outlines
