

London TDM

Information Technology and Digital Transformation Training Courses

Course Venue: United Kingdom - London

Course Date: From 21 June 2026 To 25 June 2026

Course Place: London Paddington

Course Fees: 7,500 USD

Introduction

In the ever-evolving landscape of technology, the role of IT audit and control systems is more crucial than ever. This 5-day professional course is designed to equip participants with a comprehensive understanding of IT audit processes, risk management strategies, and control mechanisms. Throughout the course, participants will gain practical insights into conducting effective audits and implementing robust control systems to safeguard organizational assets and ensure compliance with regulatory standards.

Objectives

- Understand the fundamental principles of IT auditing and control systems.
- Develop skills to conduct thorough risk assessments and audits.
- Learn to design and implement effective IT control mechanisms.
- Enhance the ability to identify and mitigate IT-related risks.
- Foster knowledge of compliance and regulatory requirements in IT.
