

London TDM

Legal and Contracts Management Training Courses

Course Venue: United Kingdom - London

Course Date: From 12 July 2026 To 16 July 2026

Course Place: London Paddington

Course Fees: 6,000 USD

Introduction

The "Contract Law for Engineers and Project Managers" course is designed to provide professionals with a comprehensive understanding of contract principles, enabling them to effectively manage and mitigate risks in engineering and project management. Through this five-day course, participants will gain insights into contract formulation, execution, and the resolution of disputes, ensuring that projects are completed successfully and legally sound.

Objectives

- Understand the fundamentals of contract law and its application in engineering and project management.
- Develop skills to draft, negotiate, and interpret contractual agreements effectively.
- Identify common contractual risks and learn strategies to mitigate them.
- Gain practical knowledge of dispute resolution techniques and legal remedies.
- Enhance decision-making skills to ensure compliance with legal and contractual obligations.

Course Outlines

Day 1: Introduction to Contract Law

- Overview of contract law and its significance in engineering and project management.
- Essential elements of a valid contract: offer, acceptance, consideration, intention, and capacity.
- Different types of contracts and their applications in projects.
- Legal terminology and key clauses commonly found in contracts.
- Workshop: Case studies on contract formation and enforceability.

Day 2: Drafting and Negotiating Contracts

- Principles of effective contract drafting.
- Best practices for negotiating terms and conditions.
- Key issues in drafting construction and engineering contracts.
- The role of standard form contracts and their advantages.
- Interactive session: Drafting and negotiating a sample contract.

Day 3: Risk Management in Contracts

- Identifying and assessing contractual risks in projects.
- Strategies for risk allocation and management.
- Incorporating risk management clauses in contracts.
- Case study: Analyzing contractual disputes and risk outcomes.
- Group exercise: Developing a risk management plan for a project.

Day 4: Contract Execution and Compliance

- Implementing contract terms: roles and responsibilities.
- Monitoring contract performance and ensuring compliance.
- Managing changes and variations to contracts.
- Documenting and reporting requirements in contract management.

- Practical session: Tools and software for contract management.

Day 5: Dispute Resolution and Legal Remedies

- Methods of dispute resolution: negotiation, arbitration, and litigation.
- Understanding breach of contract and its consequences.
- Legal remedies and damages for contract breaches.
- Steps in preparing for and managing contract disputes.
- Final assessment: Simulating a contractual dispute resolution scenario.
